#### **Precautions before installation**

Describes basic precautions that users should be aware of when installing and using the product in case of a situation that may cause bodily harm. Therefore, before installing or using the product, be sure to familiarize yourself with the information described here.

#### **General precautions**

During and after installation of the product, the area around the product must be kept clean and dust-free.

Do not leave tools, cables, etc. in the aisle, as this may result in personal injury.

When installing the product, avoid wearing loose-fitting clothes, neckties, scarves, or sleeves that may get caught in the product.

Do not take any action that could cause damage to persons or equipment.

If you need to open the cover of the product to extend the product's performance or repair a malfunction, be sure to contact the place of purchase for professional help.

#### **Power Precautions**

When connecting power to the product, first check that the wiring is not overloaded.

When connecting the power to the product, do not wear jewelry such as rings, necklaces, or watches. If these accessories are connected to a power source or ground, there is a risk of burning the parts.

Always check the work area for potential hazards. Be sure to check for wet floors, ungrounded power extension cables,

frayed internal power cords, and floors that do not have a safety grounding facility.

There must be an outlet near the appliance and the outlet must be easily accessible.

Install by service personnel and install the appliance so that it is connected to a socket-outlet with a protective earth wire.

Before proceeding with hardware installation, turn off the power of the system to be installed, and then touch a grounded surface such as the metal side of the power supply to discharge static electricity from the body.

The manufacturer assumes no liability for direct or indirect damage resulting from the use of improper parts by unauthorized service personnel.

If power is supplied during installation, it may cause damage to system components and body.

#### Power

The power cord and power outlet act as the main power disconnect device in case of an emergency such as a fire, so do not stack or block objects in front of the power outlet so that you can unplug the power cord from the power outlet at any time.

## FC

CE

#### **FCC Compliance Statement**

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

CE Marking is the symbol as shown on the left of this page. The letters "CE" are the abbreviation of French phrase "Conformité Européene" which literally means "European Conformity". The term initially used was "EC Mark" and it was officially replaced by "CE Marking" in the Directive 93/68/EEC in 1993. "CE Marking" is now used in all EU official documents.

#### Warranty

#### Standard 1 Year Warranty

- SalrayWorks product is guaranteed against any manufacturing defects for one year from the date of purchase.
- The original purchase invoice or other documentary evidence should be supplied at the time of any request for repair under warranty.
- The product warranty period beings on the purchase date. If the purchase date is unknown, the product warranty period begins on the thirtieth day after shipment from a SalrayWorks office.
- Damage caused by accident, misuse, unauthorized repairs, sand, grit or water is not covered under warranty.
- Viruses and malware infections on the computer systems are not covered under warranty.
- Any errors that are caused by unauthorized third-party software installations, which are not required by our computer systems, are not covered under warranty.
- All mail or transportation costs including insurance are at the expense of the owner.
- All other claims of any nature are not covered. All accessories including headphones, cables, batteries, metal parts, housing, cable reel and consumable parts are not covered under warranty.
- Warranty only valid in the country or region of purchase.
- Your statutory rights are not affected.

## N BOT, NDI Camera Motorized Head

k 'n u =

#### 1. Introduction

Bring the remote-control functionality to your Hand-held camcorder with the **N BOT Robotic Pan Tilt Head** from **Salrayworks**. More than just a motorized head, N BOT interfaces with PTZ-compatible co ntrol systems, allowing you the same kind of experience. From pan and tilt control to powering your camera and controlling its zoom lens via LANC or other protocols, this head is a compact PTZ solutio n for cameras weighing up to 3.2Kg. The head easily mounts to most tripod legs and with an option al bracket, it can be mounted on a wall or ceiling. It can send your camera's video output to external video displays, switchers, and controllers while also receiving control information for pan and tilt ope rations via VISCA IP or NDI . The head is equipped with LED indicators, a tally light, and a remote por t that allows you to adjust the zoom and focus of select camera lenses.

## 2. Key Highlight

Salrayworks introduces N BOT, the world's first NDI<sup>®</sup> motorized camera head.

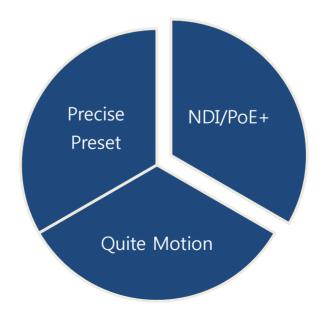

• Fitted with up to a 3.2 kg camera it moves up to 340 PAN degrees and TILT Down 35 degrees as well as 20 degrees UP 1 at a rate of 15 degrees per second.

• This exquisitely designed N BOT is incredibly quiet and smooth in motion, so it won't interfere with in-studio shooting or your live Streaming.

• The NDI<sup>®</sup> hardware (silicon-based) achieves about 140Mbit at 1080p60 and is visually lossless.

• Power (POE+) and NDI stream through an Ethernet cable. The camera's zoom-in-out, focus and IRIS can be controlled remotely using the LANC input. N BOT simplifies video streaming with cableless.

• It stores and recalls up to 10 positions with a precision less than 0.1 degrees. Whether at the studio or on the stage, memorizes the previous location with extreme accuracy and immediately begins shooting.

#### 3. Technical Specification

|            | Robotic Pan / Tilt Head  |
|------------|--|
| Input      | <ul> <li>Supports Sony VISCA operation via Ethernet connection</li> <li>POE+ (Power over Ethernet – 802.3at) support</li> <li>HDMI video/audio input</li> </ul>  |
| Pan        | Turning radius 170 degrees to the right and 170 degrees to the left ( 340 degrees )<br>** 360 degrees possible when the sensor is off**<br>Speed: 180 degrees in 10 seconds (Variable speed in 1~24 steps) |
| Tilt       | Turning radius up 20 degrees down 35 degrees<br>Speed: 15 degrees per second (Variable speed from 1 to 24 steps)   |
| Preset     | 10 position Save<br>Save Pan/Tilt Position Save , Speed Save<br>Zoom In/Out Position Save , Speed Save Pan/Tilt 1/3 ( at Zoom Servo)   |
| Ex-Control | <ol> <li>LANC input Camera<br/>Remotely control Zoom In/Out (Speed 1~12 step), Focus</li> <li>Sony Multi Control (option)</li> <li>Zoom Servo Control (option)</li> </ol>                                  |
| Tally      | Internal / external Tally support  |
| Output     | NDI output to IP over Ethernet connection<br>1080p60 full HD resolution support<br>Tally Light<br>LANC , Sony Multi , Zoom Servo   |
| Management | Front status LED support<br>Support rear USB port service terminal<br>Support for remote firmware update   |
| Physis     | Dimension : 128(H) X 157(W) X 157(D)<br>Operation Temperature : 0~45 °C<br>Weight : 1.87 Kg<br>Power Consumption: Max 30W  |

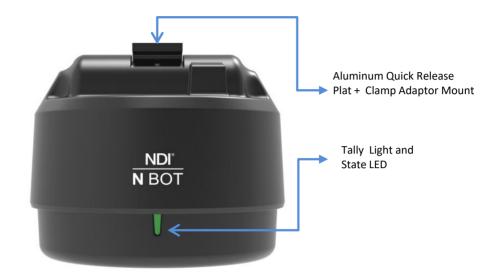

Input Voltage : AC220V 60Hz/ AC110V 60Hz/AC 24V 60Hz. Power Consumption PAN: 4.4W. TILT: 4.4WP/T Operating Speed : Left/ Right Rotation Speed: 5°/sec. Up/Down Rotation. Speed: 2°/sec P/T Operation Angle Left/Right Rotation Angle:  $0^{\circ} \sim 340^{\circ}$  Up/Down Rotation Angle:  $+45^{\circ} \sim -85^{\circ}$  Operating Temperature :- $20^{\circ}C \sim +50^{\circ}C$  Operating Humidity : Less than 90% Accurate Load: 5Kg Color: IVORY Dimensions: 152 (L)X147(H)X215(W) Material: ABS & ALUMINUM PLATE Weight: Approx. 2.2KG

Installation Precautions • It is recommended to install so that the height of the center of the housing at the top of the CAMERA MOUNT BASE is less than 50mm. Cause • Do not exceed the loading weight (5kg) of this PAN-TILT and install it so that the center of the housing member coincides with the center of this PAN-TILT. How to operate TILT (upper, lower) angle In the figure above, if you loosen two bolts in the part where the label is drawn, you can see two bolts in the half-moon-shaped groove. Loosen these two bolts 2-3 turns to adjust to the desired angle position, and tighten so that it does not loosen, the angle adjustment is successful. How to operate the PAN (left, right) angle SPT-510 There are two bolts on the top of the connector at the bottom of the outside. Loosen these two bolts 2-3 turns to adjust them to the desired angle and tighten them so that they do not loosen.

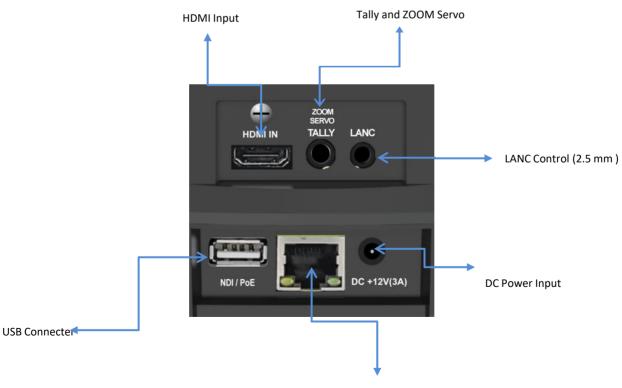

#### 4. Product Overview

- 4.1. Part
  - 4.1.1 Front

4.2. Rear

Ethernet (NDI/PoE+)

#### 4.3 Components

This product consist of

- 1. N BOT PAN TILT Head
- 2. DC Power : DC 12V 3A
- 3. Quick Release Clamp Adaptor
- 4. LANC Cable (2.5π 3pol, 2.5π 3pol)
- 5. Multiport Converter Cable(Option) Multi Protocol (3.5π 4pol, Multiport)
- 6. Multiport Lanc Cable(Option) Lanc Protocol (2.5π 3pol, Multiport)

1. N BOT PAN TILT Head

3. Quick Release Clamp

4. LANC cable

5. Multiport Converter Cable (Option)

6. Multiport LANC Cable (Option)

#### 5. Operation

#### 5.1. LED Status

The status LED has two colors, green and red, and the meaning of each color is as follows.

- Green blinking during booting
- Green blinks when command is received

- Red LED lights up when Tally On command
- Red LED turns off when Tally Off command

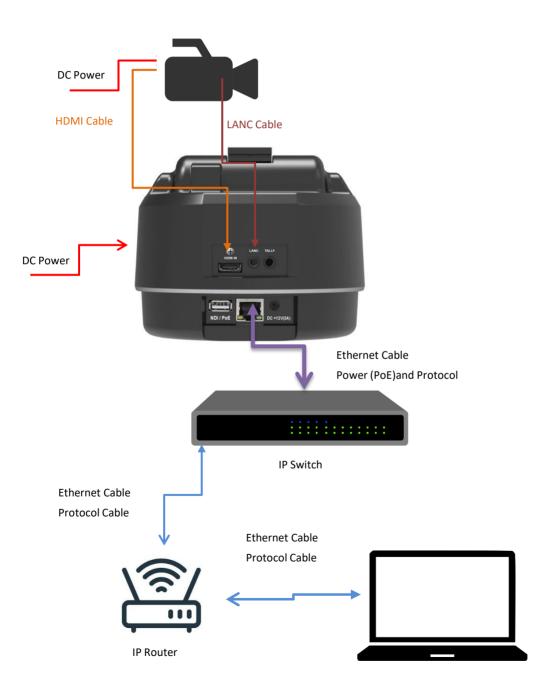

N BOT performs calibration by rotating 348 degrees at every boot.

#### 5.2. System Diagram

As shown in the figure below, N BOT is easily connected to the legacy Internet network with a camera, IP switch, router and PC with a minimal cable Ethernet cable.

#### 5.3 N BOT Controlling

- It is possible to operate and intuitive preset with fine movements through VISC IP with SHARON proSTICK Controller
- Camera OSD, PAN TILT, Preset, can be controlled with Free SW(N BOT webserver) through NDI network.
- Free Studio monitors available on NDI, TV

SHARON proSTICK Controller

#### **5.4 CAMERA COMPATIBILITY**

- You should make sure that 2.5 mm LANC terminal is on the camera
- It must not exceed 3.2Kg including the lens
- To operate the ZOOM remotely, the motorized zoom (electric) must be installed on the camera.
- Auto or Manual is not converted thru LANC, but the Camera must be manually select in advance to able to remotely support Focus and Iris.

Black Magic Cinema

SONY

Panasonic

Canon

JVC

Power, REC, Display, Auto-Focus : These functions can be operated remotely via LANC. However, the connected Camera Model must support the LANC protocol for these functions. If the camera model does not support thru LANC, you must manually set the focus in advance. Only then can the focus be adjusted remotely above menu. If the toggle button above does not work , connected camera is not supported. Up to 9 presets can be saved and recalled.

If the camera falls into a locked state due to an external shock or the weight of camera, click the icon above to display Forced Driving menu as shown below, allowing you to forcibly move the camera's PAN TILT.

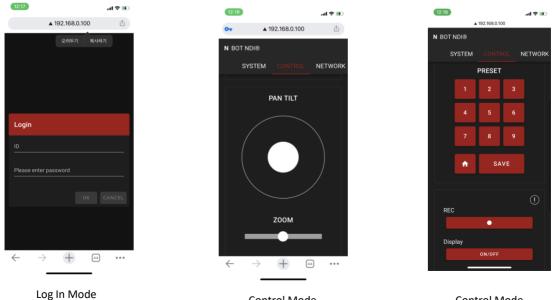

#### 7-4. Network Mode

In the Network Menu, you can change the name or IP address of currently contacted N BOT. You can select the transmission specified in the current SDI SDK version., and you can decide whether to apply the NDI group Setting.

| N BOT NDI®       |                |         |           |     |          |        |

#### 7-5. Smart Phone Mode

If you turn on WIFI on your smartphone, open a Chrome on the same network and enter the address of 192.168.0.100 you can operate the N BOT web server as below (Automatically fit the screen size)

Control Mode

Control Mode

8. SONY Multiport Converter Module.

## 8-1 The List of Camera Model

Some Sony camera models can be remotely controlled only through the Multi interface Shoe instead of the 2.5 mm LANC terminal. In this case, you must purchase the SONY Multiport Converter Module separately.

Remote support for the following function.

- Zoom Tele
   (SW command )
- Zoom Wide (SW command)
- Recoding Start/Stop (SW command)
- Auto Focus
   (SW command & HW command)
- Power On/Off (HW command)
- Sutter
   (SW command & HW command

#### 8-2 What to check if it doesn't work

- The installed ZOOM lens must have a power zoom lens type.
- Firmware version installed in N BOT must be 2.1.0 or higher
- In Zoom, the setting must be set to SERVO
- The cable must be installed before powering on the NBOT so that it can recognize the cable when booting.
